UCM Buddy

Building the outbound UCM and sending it in Notis — the whole job on one page.

kungkotz.github.io/ucmbuddy

The finished list on the left, the message ready to copy on the right.

In UCM Buddy

1 Enter the flight

Flight number, registration, station (**CPH** is already filled in), date. Press **Enter** to move on. The airline code becomes the default ULD owner.

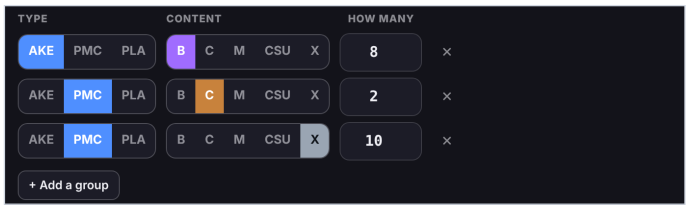

2 Say how many of each

Open **Add several at once**. One row per group: pick the **type**, the **content** and **how many** — e.g. AKE·B × 8, PMC·C × 2, PMC·X × 10. **+ Add a group** for more rows.

B	C	M	CSU	X
Bags	Cargo	Mail	Catering	Empty

3 Key in the numbers

A field appears for every ULD. Type each number and press **Enter** to jump to the next; **Enter on the last one adds them all**. Any order is fine — the app sorts them. A red field means typed twice, already in the list, or not a ULD number.

One late ULD? Use the **Add ULD** box at the top: type the number, press Enter.

4 Check the list, then Copy message

The list is sorted alphanumerically, the same order as the message. Change a content code in its dropdown, or remove a ULD with **×**. Then tap **Copy message**.

In Notis

5 Open the UCM on the flight, press View

In **DTO**, open the **UCM** on the flight and press **View**.

6 Clear the top row, paste with Alt + I

Delete what is already in the **Message text** window, then press **Alt + I**.

7 Save, then send

F3 to save (or **X**, then **Yes**). Then **View** to double-check, or **Send**.

The message

```
UCM
CA878/16OCT.B1083.CPH
OUT
.AKE27346CA//B.AKE27719CA//B.AKE28722CA//B
.AKE28947CA//B.AKE30118CA//B.AKE31661CA//B
.AKE31718CA//B.AKE31850CA//B.PMC50852CA//X
.PMC53434CA//X.PMC53470CA//X.PMC56323CA//X
.PMC69147CA//C.PMC72048CA//X.PMC72662CA//X
.PMC75511CA//C.PMC75792CA//X.PMC77227CA//X
.PMC77728CA//X.PMC78238CA//X
```

Header: flight / date **with** month . reg . station. Three ULDs per line, sorted by full ULD ID. No ULDs gives `OUT` then `N`.

Good to know

Clear list	removes every ULD, keeps the flight
Start over	erases everything, back to the start
Flight line (top)	tap it to change flight, reg, station or date
Refresh or reopen	your work is still there
